

Designer who builds what ships.

10 years designing digital products across editorial, regulated sports betting, and B2B software. I design and build, turning ideas into products that actually ship.

EXPERIENCE

— INDEPENDENT PRODUCT DESIGNER

Independent Product Designer

Present

- Design and build conversion-focused Webflow sites for small businesses.
- Improved client conversion by 15% through simplified user flows.
- Deliver accessible, performant sites optimized for search.
- Designed in Figma or Paper and built on Webflow manually or with MCP use of Claude and Codex.

Product Designer & Builder / Palleta

Feb 2025 – Present

- Designed and built a B2B point-of-sale and inventory platform for orders, invoicing, customers, products, and warehouse stock.
- Created role-based experiences for five user types across admin, sales, and warehouse workflows.
- Built automated four-tier customer pricing directly into order creation.
- Created a reusable component system for pages, tables, stats, modals, loading states, and dark mode.
- Built with React, TypeScript, Tailwind, Supabase, and Capacitor for web, iOS, and Android.

Product Designer (UI/UX) / WynnBET

Mar 2022 – Oct 2023

- Co-led the sportsbook and casino redesign across desktop, mobile web, iOS, and Android.
- Built a scalable design system supporting state-specific regulatory requirements.
- Created journey maps, user flows, and high-fidelity designs with Product, Engineering, Marketing, and Compliance.
- Designed promotional landing pages for feature launches.

Web Producer / GQ Magazine

Mar 2015 – Mar 2022 · New York, NY

- Managed daily production for GQ.com articles, galleries, and e-commerce.
- Used analytics to optimize homepage content and worked with editors on newsletters and lead art.

PERSONAL WORK

Grocery Spending Tracker

Closed beta, 4 testers · Built in React, TypeScript, Tailwind, Supabase

- Designing and building a React/TypeScript app that helps households track grocery spending and compare historical prices.
- Testing photo vs. manual purchase logging and focusing on reducing the friction required to record purchases.
- Currently using beta insights to shape the next iteration.
